Hiring companies

80%
Average salary hike

ELIGIBILITY 2+ years of work experience, IT or non-IT. Career breaks welcome.

WHAT YOU'LL LEARN

5 modules. Real, job-ready work.

Five live modules that take you from spreadsheets and reports to analysis people act on: SQL, BI dashboards, Python and the statistics that matter.

01 SQL in depth

- Joins, aggregation and window functions
- CTEs, subqueries and query readability
- Query plans and making slow queries fast
- Analytical patterns: cohorts, funnels, retention

02 Visualisation and BI

- Power BI data model and relationships
- DAX: measures, context, time intelligence
- Dashboard design that answers one question well
- Tableau fundamentals and when to use which tool

03 Python for analysis

- pandas: reshaping, joining, grouping
- Cleaning messy real-world data
- Matplotlib and readable charts
- Automating a recurring report

04 Statistics that matter

- Descriptive statistics and distributions
- Hypothesis testing and confidence intervals
- A/B test design and reading the result honestly
- Correlation, causation and common traps

05 Business and communication

- Framing a vague request as an answerable question
- Writing an analysis someone will act on
- Stakeholder pushback and defending a number
- Portfolio review and case-study write-ups

Tools and stack

The tools hiring managers ask about for Data / BI Analyst roles, used in every module and project.

SQL · Power BI · Python · Excel · Tableau · Statistics

Projects you build

Company-style work you can explain in interviews

PROJECT 1

Retail analytics end to end

Take a raw transactional dataset to a warehouse model, a Power BI dashboard, and a written recommendation with the numbers behind it.

PROJECT 2

Funnel and cohort analysis

Find where users drop out of a product funnel, quantify it, and propose the one change worth testing first.

PROJECT 3

Automated reporting

Replace a manual weekly report with a Python job, then document what it costs to run and what breaks it.

WHO IT'S FOR

Built for people who already work.

3-month live programme for working professionals (IT and non-IT) and people returning after a career gap.

Working IT professionals

Support, QA and reporting engineers who want to move into an analytics role.

Non-IT professionals

Business analysts, MIS executives, operations and finance professionals who want a technical analytics role.

Returning after a career gap

Professionals coming back after a break who want job-ready analytics skills and help explaining the gap.

ELIGIBILITY 2+ years of work experience, IT or non-IT. Career breaks welcome.

How it works

From your first call to your offer letter

1	**Profile assessment**	We review your experience and goals and confirm this track fits you.
2	**Live training**	Instructor-led batches on weekday evenings and weekends, online or in our Bengaluru classroom.
3	**Projects and 1:1 mentoring**	Build the projects above with a mentor who reviews your work and unblocks you.
4	**Resume and LinkedIn rebuild**	Rewritten around your projects and the Data / BI Analyst role you are targeting.
5	**Unlimited mock interviews**	Technical and HR rounds with feedback after each one, until you are ready.
6	**Referrals and placement support**	Referrals to hiring partners, interview scheduling and offer negotiation help, until you are hired.
