## Projects you build

Company-style work you can explain in interviews

PROJECT 1

**End-to-end FICO configuration**

Configure a company code from scratch through to a working month-end close, documented as a client would receive it.

PROJECT 2

**Intercompany scenario**

Handle intercompany postings and reconciliation, including the edge cases that break a naive setup.

PROJECT 3

**Requirement to specification**

Take a vague client requirement and turn it into a functional specification and test plan.
